

# FASTLEARNING

## PROBLEM

The main problem that arises in the community (students) is problems with learning or they simply do not like to study and therefore their grades are insufficient to pass certain subjects, such as mathematics, Spanish and English, which are subjects with the poorest grades with respect to the others.

## METHODOLOGY

This platform allows students to build their own study plan for the reinforcement of the subject that you want to improve. Users can choose among a wide variety of courses and learning routes.

## SPECIFIC OBJECTIVES

- 1.1) Diagnose which are the areas in which we are going to need the most generate an application with topics covered in learning different media.
- 1.2) Analyze which are the most viable strategies for reinforcing the subjects that students from sixth to ninth have greater need.
- 1.3) Design an application to reinforce activities that include areas such as mathematics, language and natural sciences among others.
